OFFICE AND NURSERY
WESTFIELD

Information

Location:—Our office, nursery and storehouses are located on the Springfield-Westfield road, six miles from Springfield and two miles from Westfield. Busses pass the nursery at frequent intervals. Our **Post Office** is **Springfield**.

Telephones — Springfield and Westfield Exchanges.

Purchasers should plainly state by what route their goods are to be conveyed.

Shipments will be forwarded exactly as you direct, but in the absence of instructions we will use our best judgment and forward plants by shortest and safest route.

Guarantee and Claims:—All plants are guaranteed true to name, full count, up to grade and in good condition when shipped. We will replace any plant or tree proving untrue to name. Our nursery stock is of highest quality, thrifty, well grown, insuring its success if properly cared for after transplanted in your soil. As we have no control over its care and treatment after it is carefully packed and shipped, we can give no guarantee on the life of the stock; however any just complaint will receive our careful consideration.

No complaints will be considered that are not made within ten days after receipt of stock.

Prices:—The articles offered in this catalog will be furnished at the annexed price only when the quantity specified shall be taken. **Fifty** at the **hundred** rate and **five** at the **ten** rate.

Shipping Season:—Our spring shipping season usually begins early in April and lasts until about the first of June. Stock dug with balls of earth may be successfully transplanted throughout the month of June. Our fall season as a rule starts with the digging of Evergreens the early part of August followed by the shipping of Deciduous Trees and Shrubs the first of October.

EVERGREEN TREES

In recent years evergreen trees have increased in popularity to such an extent that no home is complete without them. They add charm and color to the landscape, especially in winter. The dwarf types are most suitable for planting about the foundation of buildings and their use in such places adds an air of beauty and distinction unrivaled by any other class of plants.

Our evergreens are grown especially for landscape planting where well developed plants are necessary for finished effects.

They have been frequently transplanted so as to develop sufficient root growth to enable moving successfully, and have been pruned to produce a thick symmetrical growth.

ABIES concolor

YEWS

No class of evergreen is more effective in a planting than the Yews with their rich and luxuriant foliage. Of extreme hardiness, they adapt themselves to many unfavorable conditions and do exceedingly well in the shade. Being rather slow in growth and withstanding shearing well they are most valuable in base or foundation plantings.

COLUMNAR YEWE

During the past decade many new varieties of Taxus have been produced. From these new sorts, after careful trials, we consider the COLUMNAR yew, because of its distinct habits of growth a most valuable addition to the hardy yews. It grows extremely upright and narrow like the Irish juniper and can be used in many places where a narrow tree is desired and for a formal hedge, where compact line is required it has no equal. For foundation plantings it will be found most valuable.

EVERGREEN SHRUBS

Broad-Leaved Evergreen Shrubs hold their rich green foliage all the year round. Many varieties make a beautiful showing with their magnificent blooms. Most varieties are shade-loving plants which make them ideal for foundation plantings where there is little sun. Broad-leaved evergreens are most successful when planted in groups. A mulch of Peat Moss or leaves should be maintained the year round to keep the roots, which are close to the surface, moist.

MAX GRAF

Makes an excellent pillar or climbing rose. The foliage resembles *Rosa Rugosa*, is retained very late in the season, it is practically immune to insects and diseases and is absolutely hardy. Its flowers are large, single, bright pink with prettily crimped petals. For planting on a steep bank or for trailing over a stone wall, it has no equal.

\$0.75 each, \$8.00 doz., \$65.00 per 100

ROSA HUGONIS

Golden Rose of China. Delicate single yellow flowers in long, arching sprays in May along with the lilacs. It develops into a bush 6 feet high and 6 feet wide. A rare rose named for Father Hugo, who discovered it in China. Plant it wherever a delicate showy, flowering shrub is needed.

\$0.60 each, \$6.00 doz.

ROSA ROULETTI

This dainty little pink rose blooms continuously. It grows about 3 to 5 inches high and is an excellent plant for rock gardens.

\$1.25 each

F. J. GROOTENDORST

A cross of *Rosa Rugosa* and Baby Rambler. A strong, shrubby grower like the *Rugosa*, which it resembles in foliage as well. The flowers are produced in large clusters like the Crimson Baby Rambler.

Two year plants, \$0.60 each, \$6.00 doz.

Hardy Climbing Roses of Recent Introduction

BLAZE (Everblooming Paul's Scarlet Climber)

Plant Patent No. 10. Seedling of Paul's Scarlet Climber and Gruss an Teplitz. A marvelous, hardy, everblooming scarlet-red rose.

\$2.00 each

HARDY CLIMBING ROSES—continued

(Mrs. Arthur Curtis James)
PLANT PAT. NO. 28

The full blown rose is semi-double, averaging four to five inches in diameter, with a heavy tuft of nankin yellow stamens.

The petals are gracefully scalloped and curled.

Able to withstand sub-zero temperatures, the plant stays "put" anywhere and its handsome glossy foliage, green wood and red thorns are ornamental even out of bloom.

"**GOLDEN CLIMBER**" does not make a short blast of bloom like most climbers. Its beauty is long lasting. After the first prolonged period of bloom some magnificent flowers can again be expected and "The Last Rose of Summer" may come from Golden Climber. \$2.00 each.

NEW DAWN. EVERBLOOMING DR. VAN FLEET

Recently introduced under Plant Patent No. 1.

Flowers come continually from early summer until freezing weather.

\$1.50 each

Climbing Roses

MARY WALLACE. Well formed, semi-double flowers of a bright clear rose-pink with salmon base to the petals, flowers large, generally exceeding 4 inches in diameter, very free flowering.

MME. GREGOIRE STÆCHELIN

The long-pointed buds are crimson at first as the sepals divide, then the firm outer petals show splashes of carmine as the flower opens, with an iridescent pearl-pink inside and it is richly perfumed.

PAUL'S SCARLET CLIMBER. Vivid scarlet, semi-double flowers of medium size, which do not burn or fade in the sun. Produced in large clusters in great profusion. Extremely hardy.

PRIMROSE, THE NEW YELLOW RAMBLER

In color light primrose-yellow which is maintained until the petals drop. Its flowers are borne in trusses of from 2 to 5, on long stems, about 2½ inches in diameter. The plant is of vigorous climbing habit, free flowering, mid-season, and the flowers last in good condition for a long time, with healthy dark foliage.

SILVER MOON. Clear, silvery-white. Foliage is mildew-proof. Fragrant.

TAUSENDSCHON. Soft pink turning to flesh. The blossoms are produced in large trusses.

WHITE DOROTHY PERKINS. Same as Dorothy Perkins, except color is white.

Two-year dormant plants, \$0.50 each, \$5.00 doz., \$40.00 per 100

SABIN
“GUMFINGER”
TRADE MARK REG. LAWN RAKES

Here is a new type rake—one that can’t rust, can’t clog, can’t break and can’t tear up the lawn. The flexible, rubber teeth on Sabin Gumfinger Rakes adjust themselves to every irregularity in the ground surface and sweep clean without uprooting or tearing grass.

Every rake is guaranteed for three years against deterioration of rubber.

This is the safest rake on the market. The rubber teeth prevent injury if the rake is stepped on or children fall upon it.
